Distributed Computing & the Web

Time check… we need to start our Lab at 2:30.
Why have I changed the "Worldwide Web" to the "Internet"? By the end of this class it is your responsibility to know the difference.

Web and Distributed Programming

Session: Week 1 Session 3
Instructor: Eric Pogue

Agenda:

1. Friendly Conversation & Good Natured Banter
2. Review Assignment for Today
3. Distributed Computing and the World Wide Web
4. Lab: "Hello World – HTLM EJP" (~20 min)
5. Assignments, Wrap-up, and Final Comments (~5 min)

Discussion & Questions welcome at any time… please be present with no phones or email during our discussion time

Lab: "Hello World – HTML! EJP"

1. Log into your computer
2. Open your favorite text editor
3. Review HTML5 Hello World implementation from the Web [link]
4. Type in your own "Hello World – HTML! [your initials]"… Please be specific*
   - Type in your initials and not '[your initials]'
   - For "Hello World – HTML!"
   - Utilize an em dash '–' in your HTML5/UTF-8 code [link]
   - Do you really understand the difference between ANSI and UTF-8? [link]
   - Utilize one space after punctuation marks like periods and exclamation points [link]
5. Save your file as a HTML utilizing dash-separated naming
   - 'hello-world-ejp.html'… please use your own initials
   - Recall why we do <u>not</u> want to utilize spaces in our file names [link]
6. Now launch your Web Browser and open the file you have just saved
7. Save this file to a safe place where you will be able to find it later… how will you choose to name your folders?
8. Submit the file through Blackboard
